

RS1G

RS1 GUARDSMEN

Built to the same exacting standards as our top flight marching snare drum, the RS1G features a Levitone™ snare mechanism on the lower head only for a more traditional approach to parade drumming.

The drum features Pre-dampened batter head, Traditional military-style aluminium hoops, and a lower parallel snare mechanism for added versatility. Its polished stainless steel ball feet and Palladium lugs provide stability and an elegant appearance. The Mk2 Palladium Strainer ensures precise snare control, while the Magnetik drum key allows for easy tuning adjustments.
