MADE IN BRITAIN

RS1CADET

A STEP IN THE RIGHT DIRECTION

The RS1C is a smaller shell drum featuring a single Levitone™ snare mechanism on the upper head which offers an alternative to a conventional twin snare system. This snare is ideal for younger players wanting a traditional twin-snare sound.

With a 14" x 10" shell size, the RS1C is smaller than standard snare drums. Constructed from 8-ply, 5mm Grade A Scandinavian Birch, the shell ensures durability and excellent tonal properties. The 45° bearing edges contribute to enhanced resonance and projection.

- 14" x 10" Parallel Action Upper Snare
